Sustainable Ships
SUSTAINABILITY ON DEMAND

Clean energy

Dual-fuel | Clean fuels

Eltronic FuelTech is market leader in technology for **alternative fuels** like Methanol and Ammonia, ensuring safety, efficiency and reliability.

Eltronic
FUELTECH

Solar PV | Marine solar power

Clean energy generated by fully **marine approved** photovoltaic (PV) **solar panel system** for all types of vessels in various configurations.

WAPS | Rotor sails

Anemol Rotor Sails: propelling ships into a sustainable future. Both fuel and emissions can see a **reduction of 5% - 30%** of your vessel's footprint.

ANEMOI

Energy efficiency

H₂ power & propulsion

E-Cap Marine designs and integrates **hydrogen fuel cell** propulsion systems, allowing vessels to (partly) operate on zero-emission or generate energy onboard.

Shaft generator & VFD-upgr.

Our class approved **split-type** shaft generators ideal for onboard power generation and our VFD-upgrade for pumps can save **up to 40%** of your energy consumption.

Battery packs & integration

E-Cap Marine are specialized in design & integration of (*customized*) battery PowerPacs. Scalable, marine certified components and containerize solutions.

Emission treatment

CO₂ | Carbon Capture

Three diversified technologies – **Carbon Capture** with Amine, with Calcium Hydroxide and Molten Carbonate Fuel Cells (MCFC).

ECOSPRAY
technologies for the planet

CH₄ | Methane slip catalyst

Methane slip accounts for up to 24% of GHG emissions from a LNG-fueled vessel. This **catalyst** is the solution for your four-stroke engine.

ECOSPRAY
technologies for the planet

Particle PM | DPF filtration

Diesel particulate filters (DPFs) to **remove soot** and other **particulate matter (PM)** from the exhaust of a ship's diesel engines, reducing air pollution.
