

Get inspired by what you can do

MARINE DECARBONIZATION SOLUTIONS

Practical technologies for reducing fuel consumption and emissions

EXPLORE
ALL SOLUTIONS →

shipdecarb.com/solutions

Energy saving

WAPS | Rotor sails →

Fuel and emissions reduction of 5–30% of fuel consumption by wind assist.

ANEMOI

Central cooling system optimization →

Up to 85% pump energy reduction with FUELSAVE® saves 3–8% fuel consumption.

Vexve

Battery & shaft generator →

Marine electric zero-emission propulsion and containerized battery solutions.

SETH

Clean energy & fuels

Dual fuel | clean fuels →

Valves and fuel preparation systems for Ammonia, Methanol, Ethanol & LNG.

FUELTECH
PART OF GAO MARITIME GROUP

Solar PV | Marine solar power →

Marine approved solar PV systems for all types of vessels reduces hotel load.

MARINE-PV
众纳电气

H₂ power & propulsion →

Hydrogen fuel cell systems for (partly) zero-emission sailings.

ecap
MARINE

Emission & compliance

CH₄ | Methane slip sensor →

IMO approved sensors help you prove lower CH₄ emissions for FuelEU.

Green Instruments

CH₄ & NOx | Emission cleaning →

Methane slip catalyst, SCR-systems and DPf / DOC filters.

STILWORX

H₂O | Water treatment →

Water treatment and filtration systems with patented OilRepellent™ technology.

alfawater

World of regulations / calculations →

FuelEU Maritime, CII, ETS, MRV, Feasibility study, ROI calculations
